liveBook - Manning

A semantic event which indicates that a component-defined action occurred. This high-level event is generated by a component (such as a Button) when the component-specific action occurs (such as being pressed).The event is passed to every ActionListener object that registered to receive such events using the component's addActionListener method.

ActionEvent (Java Platform SE 8) - Oracle

We argue that the changes to Java 8 were in many ways more profound than any other changes to Java in its history (Java 9 adds important, but less-profound, productivity changes, as you'll see later in this chapter, while Java 10 makes much smaller adjustments to type inference).

Java 8 In Action PDF - books library land

Java 8: The Missing Tutorial. Java 8 is not a new topic anymore. There are many good books published on it. Still I meet many Java developers unaware of the power of Java 8. The goal of this microbook is to cover some of the most important Java 8 features and how they can help developers in their day to day programming.
