Business Process Technology Seminar Presentation of ...

Even though semantic service provisioning is still a hot research topic, many projects and collaborations already gained a tremendous amount of experiences. This chapter sketches the prototype experiences from one of these projects, the European integration project ASG, which was also the starting point for this book.

Application and Outlook | SpringerLink

Although the amount of offered Web services is continuously increasing and the Internet of products shifts more and more towards an Internet of services there is still a big lack of efficient service allocation and price determination. Currently, services are mostly charged as flat fees and pay-per-use prices. Albeit static pricing is the most common pricing scheme, dynamic and decentralized ...
