The Fragmented Podcast is hosted by Donn Felker and Kaushik Gopal and is a great audio source if you are an Android developer. I especially enjoy the "Effective Java" series where they explain concepts from the book "Effective Java" by Joshua Bloch in a nice accessible way. They also have interesting guests in their show from time to time and discuss various Android and general programming related topics like design patterns, libraries, graphics and general best practices.

Csound is a Domain-specific computer programming language for audio programming. It is called Csound because it is written in C, as opposed to some of its predecessors. It is free software, available under the LGPL. Csound was originally written at MIT by Barry Vercoe in 1985, based on his earlier system called Music 11, which in its turn followed the MUSIC-N model initiated by Max Mathews at the Bell Labs. Its development continued throughout the 1990s and 2000s, led by John Fitch at the Univer

Game Audio Relevance Assorted bits of game sound design and audio programming. The Game Audio Tutorial A book aimed at teaching sound designers to implement sound in UDK while teaching game sound design principles. A lot of it is about fighting UDK's audio and Kismet, but once again it's useful to see things from the non-programmer side.
