Manually focusing a lens means controlling and therefore actively composing an image gently and precisely from your fingertips. Here, a good ergonomic design makes all the difference. ZEISS Milvus Lenses feature a large rotation angle which enables pinpoint focusing.

ZEISS Milvus 1.4/25 | Manual focus lens for Canon & Nikon ...

With the release of the Zeiss Otus 55mm f/1.4, which is just a stellar performer (one of the highest performing lenses I have measured using Imatest), the biggest issue for many of us is lack of autofocus. Modern DSLRs, even with large full-frame pentaprisms make it hard to focus with manual focus lenses.

Why Zeiss Does Not Make Autofocus DSLR Lenses

Product description The Zeiss 55mm f/1.4 Otus Distagon Manual Focus Lens for Canon EF Mount is a standard focal length premium lens especially optimized for full-format DSLR camera sensors.

Modern digital photographers looking for a more distinctive look have turned to classic manual focus lenses; and one of the most popular of these is the Soviet Helios 44-2, famed for its swirly bokeh. However, the Helios (despite being a great lens) is not unique. In fact, it's a derivative of the famed Biotar 58mm f/2 lens, produced by Carl Zeiss Jena from 1936 until 1960.
